

Title: How to develop Right Join Exclusion feature(way: 01)?

#01

```
select * from stdtbl
right join usttbl
using(pid)
where prole is null;
```

#02

```
select * from stdtbl
right join psttbl
using(pid)
where prole is null;
```

#03

```
select * from stdtbl
right join usttbl
using(pid)
right join psttbl
using(pid)
where usttbl.prole is null and psttbl.prole is null;
```

#04

```
select stdtbl.pid, pname, edu from stdtbl
right join usttbl
using(pid)
right join psttbl
using(pid)
where usttbl.prole is null and psttbl.prole is null;
```

#05

```
select stdtbl.pid, pname, edu from stdtbl
right join usttbl
using(pid)
right join psttbl
using(pid)
where usttbl.prole is not null and psttbl.prole is not null;
```
