

Title: How to develop Left Join Exclusion features(way: 01)?

#01

```
select * from stdtbl  
left join usttbl  
using(pid)  
where prole is null;
```

#02

```
select * from stdtbl  
left join psttbl  
using(pid)  
where prole is null;
```

#03

```
select * from stdtbl  
left join usttbl  
using(pid)  
left join psttbl  
using(pid)  
where usttbl.prole is null and psttbl.prole is null;
```

#04

```
select stdtbl.pid, pname, edu from stdtbl  
left join usttbl  
using(pid)  
left join psttbl  
using(pid)  
where usttbl.prole is null and psttbl.prole is null;
```
