

Title: How to develop Database Object for enhance join features using MySQL RDBMS backend software?

```
#01
system cls
```

```
#02
show databases;
```

```
#03
Create database if not exists dbspr
character set latin1
collate latin1_swedish_ci;
```

```
#04
show databases;
```

```
#05
select database();
```

```
#06
use dbspr;
Database changed
MariaDB [dbspr]>
```

```
#07
select database();
```

```
#08
show tables;
```
