Title: How to develop Table Object for enhance Natural Join feature?

```
#01
select database();

#02
create or replace table pfntbl
(
rno int primary key,
fname varchar(2) not null
);

#03
create or replace table plntbl
(
rno int primary key references pfntbl.rno,
lname varchar(2) not null
);

#04
show tables;

#05
select * from pfntbl;

#06
select * from plntbl;

#07
insert into pfntbl
values
(1001, 'aa'),
(1002, 'bb'),
(1003, 'cc'),
(1004, 'dd'),
(1005, 'ee');

#08
insert into plntbl
values
(1001, 'x1'),
(1002, 'x2'),
(1003, 'x3'),
(1004, 'x4'),
(1005, 'x5');

#09
select * from pfntbl;

#10
select * from plntbl;
```
